

For corner / near-edge printers

The AG2 is a multi-purpose wax resin product and is Toshiba's most popular ribbon type for near edge printers. Its highly versatile performance fulfills the needs of most standard applications. It lays down a clear and sharp printed image on most label stocks, from uncoated and glossy papers to synthetics. Withstanding heat up to 100°C (212°F) with a blackness of 1.6(ODR) the AG2 will give good levels of mechanical resistance and, as with all Toshiba ribbon products, its superior back coating will prevent static build-up and clogging, and offer the very best in printhead protection.

Toshiba AG2 ribbons – high quality smearless printing.

Available for

B-882	B-492	B-572	B-SX4	CB-426
B-682	B-372	B-672	B-SX5	
B-482	B-472	B-872	CB-416	

Characteristics

- Excellent material compatibility
- Excellent for high speed printing
- Clear sharpness of 90° barcodes
- Very good smudge resistance and blackness
- Available in colours

Specifications

Ribbon thickness	Microns	< 8.5 µm
Ink	Type	Wax/resin
	Melting point	80°C
Carrier	Type	Polyester film
	Thickness	4.5 ± 0.3 µm
	Tensile strength*	> 300 N/mm ² (MD)
Back Coating	Silicone product based	Low coefficient of friction: Kd < 0.2
	High temperature of resistance	
Optical Density	Optical Density by Reflection (ODR)	> 1.6 (Macbeth TR 927)
Smudge Resistance*	No print damage after 200 runs (Crockmeter, smudge pressure of 680 g/cm ² load)	
Colours	<ul style="list-style-type: none"> ● Black, ● Blue (Reflex blue C), ● Red (1788 C), ● Green (Green C), ● Yellow (Process yellow C), ● Magenta (Process magenta C), ● Cyan (Process cyan C), ● Orange (151 C) 	

*Please note that not using TOSHIBA approved ribbons affects any printer and printhead warranties offered by TOSHIBA Europe. Always choose Toshiba ribbons for Toshiba printers

The wide range of Toshiba ribbons available today ensures that our valued customers have different product options for virtually every thermal transfer application. Using Toshiba ribbons ensures optimum print quality causing minimum wear on working parts - in particular to the printhead.

Before a ribbon is certified by Toshiba it must first undergo stringent tests to ensure its continuity and reliability in the field. It is assessed on a variety of receiving materials, and at every speed and temperature combination. Only once this procedure is complete and deemed successful will the ribbon receive its certificate of approval.

This commitment to quality and reliability is what you would expect from Toshiba as the biggest thermal transfer ribbon distributor in Europe.

Other approved ribbon types available

Standard applications	<ul style="list-style-type: none"> ● Wax ● Wax resin 	<ul style="list-style-type: none"> ● Super wax resin ● Full resin
Specialist resins for	<ul style="list-style-type: none"> ● Wash-care & textile labelling ● Harsh chemical and industrial uses 	<ul style="list-style-type: none"> ● Extreme automotive and aviation environments

Colour ribbons are also available in all qualities including HazChem orange.
